Batch - 12

CENTRALIZED APPROVAL PROCESS FOR SEAMLESS USER EXPERIENCE

Team Members:

1. Abishragav S (727622BAD029)
2. Praveen R L (727622BAD065)
3. Namitha S (727622BAD075)

PROBLEM STATEMENT:

How might we simplify the approval process by creating a single-window platform that allows entrepreneurs to easily obtain all necessary approvals from various government agencies, reducing delays and improving efficiency?

PROBLEM IDENTIFIED:

A single-window platform would centralize interactions and submissions, reducing time spent with multiple agencies. It would eliminate redundant paperwork through digital submissions, improving accuracy and reducing delays. Real-time tracking would enable entrepreneurs to monitor application status, ensuring transparency and reducing follow-ups. The platform would enhance collaboration, speed up decision-making, reduce costs, and create a more efficient, predictable process, fostering entrepreneurship and improving operational efficiency for both entrepreneurs and government agencies.
